

Brazil E-Commerce Sales Analysis | Excel + SQL + Power BI

Description

Built an end-to-end analytics project using Excel, PostgreSQL, SQL, and Power BI on a Brazil e-commerce dataset. Performed data cleaning and preprocessing in Excel, conducted SQL-based joins, aggregations, KPI analysis, delivery analysis, payment analysis, seller performance analysis, and monthly revenue trend analysis using PostgreSQL. Designed an interactive Power BI dashboard to visualize revenue trends, payment distribution, order status, top-performing sellers, and regional sales performance to generate actionable business insights and support decision-making.
